Benchmarking Performance

Given the expense and effort required to consistently produce high-quality social content, it's critical that brands understand what truly resonates with their audiences to maximize ROI and achieve lasting success. While metrics like follower count and growth rate remain important, brands are looking to measures such as engagement, owned reach, and posting cadence to gain a deeper understanding of how content is received. Learn why the following KPIs are critical to brands' social strategy.

Methodology

For the 2H 2024 Social Media Benchmark Reports, Dash Hudson pulled a sample of global companies across TikTok (n=1,150), Instagram (n=2,956), and YouTube (n=631), analyzing their activity between January 1, 2024 – June 30, 2024, to determine average performance against a predetermined set of KPIs. These benchmarks include handles with a minimum of 1K followers, from both customers and non-customers. The results have been published in separate reports broken down into the following industries: beauty, fashion, luxury, media and publishing, CPG, food and beverage, retail, home, baby and children, wellness, B2B and sports.

Defining the Sports Industry

The sports industry includes brands that offer products and services in sportswear, athletic footwear, sports equipment, outdoor gear, sports media, and sports teams.

KPIs

Average Monthly Growth Rate

The average number of followers added on a monthly basis.

Why It Matters: It helps brands understand the rate at which the industry is growing and how they measure up.

Cross-Channel Engagement Rate

The Cross-Channel Engagement Rate is a metric that was created to compare each platform's short-form video offering equally.

TikTok and Instagram: $(\text{Likes} + \text{Comments} + \text{Shares}) / \text{Reach}$.

YouTube: $(\text{Likes} + \text{Comments} + \text{Shares}) / \text{Video Views}^*$.

*As Reach is not an available metric for YouTube, Video Views was used.

Why It Matters: It helps brands understand the rate at which the industry is growing and how they measure up.

Average Reach (TikTok and Instagram)

The average number of unique accounts that see your post.

Why It Matters: It helps brands understand the number of unique people its message reaches. This is important because it provides insight into brand awareness.

Average Entertainment Score (TikTok and Instagram Reels)

The Entertainment Score is a proprietary Dash Hudson metric and is scored against a global database of industry benchmarks.

Why It Matters: It helps brands understand how entertained its audience is by a TikTok or Reel.

Average Engagement Rate (TikTok and Instagram)

The average Engagement each post receives.

TikTok Engagement Rate = $(\text{Likes} + \text{Comments} + \text{Shares}) / \text{Video Views}$.

Instagram Engagement Rate = $(\text{Likes} + \text{Comments}) / \text{Followers}$.

*This TikTok calculation differs from what is used in Dash Hudson's platform. Video Views is used instead of Reach in order to include brands that are not customers.

Why It Matters: It helps brands understand the rate at which the industry is growing and how they measure up.

Average Effectiveness Rate

A Dash Hudson metric that includes video views as a way to understand video performance.

Effectiveness Rate = $(\text{Likes} + \text{Comments} + \text{Saves} + \text{Video Views}) / \text{Est. Reach}$.

Why It Matters: It helps brands understand how posts were received by those who saw it, rather than the brand's total Followers.

Average Number of Weekly Posts

The average number of posts brands share per grouping and industry.

Why It Matters: It helps determine the right cadence for posting.

Average Video Views

The average number of views each video receives.

Why It Matters: Users watching video more often have a higher likelihood of remembering brand messages or products.

Average Shares

The average number of times each piece of content is shared.

Why It Matters: Shares indicate that content resonates with users and is deemed 'shareable'.

Average Comments

The average number of comments that each post receives.

Why It Matters: Comments signify community and suggest that users connect with the video.

Retention Rate (TikTok)

The percentage of a video that people watched.

Retention Rate = $\text{average time watched} / \text{video duration}$.

*This number can be over 100% if viewers rewatch a video.

Why It Matters: Understanding how long audiences stay engaged is key to figuring out what types of content work on TikTok.

Cross-Channel Trends

TikTok Is Still the Best Platform for Engagement

When using a common metric to compare engagement across all channels (cross-channel engagement rate), TikTok leads with 4.5%, followed by Instagram with 4.0% and YouTube with 2.8%. This indicates that TikTok has superior user interaction. This trend continues in short-form content, with TikTok leading at 4.5%, followed by Instagram Reels at 3.6% and YouTube Shorts at 3.4%. These figures underscore TikTok's effectiveness in captivating and engaging its audience, while brands see lower engagement in Reels than Instagram overall.

TikTok Has Caught up to Instagram Reels in Reach

Historically, Instagram Reels has outperformed TikTok due to its seniority and built-in user base. However, this recent analysis shows the gap is narrowing. Instagram now only leads by 4%. This highlights TikTok's growing influence and the strength of its algorithm, especially considering how brands often have fewer followers on TikTok than Instagram.

“Shares” Become the Metric To Watch

All three platforms have seen a significant increase in shares compared to six months ago. This trend underscores the growing importance of creating shareable content as more conversations are moving into direct messages. The rise in shares highlights that regardless of user behavior changing, share-worthy content from brands still sees meaningful engagement.

@werenotreallystrangers

Dash Hudson Insight

Create highly engaging, shareable content across TikTok, Instagram and YouTube to boost interaction, reach and conversations. Take advantage of each platform's growing engagement and capitalize on trendy content to grow your community.

TikTok Trends

TikTok Continues to Experience Rapid Growth and Widespread Popularity

Brands on TikTok still see momentum, with 6% monthly follower growth. Brands are more invested in the channel than ever, increasing their posting cadence to 6 times a week, up from 5 times a week over the past year. This consistent growth and increased posting frequency highlight how TikTok is a key focus for both brands and users.

Brands Are Producing Better Content and Seeing Better Results

Average Entertainment Scores have grown from 3.6 to 3.8, shares from 111 to 146 and overall reach by 5%. Brands have gotten better at creating the entertaining, highly shareable content that users are most likely to engage with, and the algorithm is rewarding them. This also highlights how competition for creating great content is heating up, and brands need to get good at becoming entertainers to grow their social channels.

Brands With Higher Engagement Rates Attract More Followers

As an algorithm-based platform, the objective for TikTok is to make engaging content, not grow follower count. However, follower growth is one indicator that brands are succeeding. This trend can be visualized as the circle of engagement: create good content, drive engagement, gain followers, and in turn, these followers contribute to even more engagement. As a result, large brands (4.3%) outperform established (3.6%) and growing (3.3%) brands in engagement rate.

@gisou

Dash Hudson Insight

Brands that post more often have increased Entertainment Scores and shares. Focus on creativity and consistency to maximize reach and audience engagement.

Instagram Trends

Engagement Sees an Uptick While Reach Remains Flat

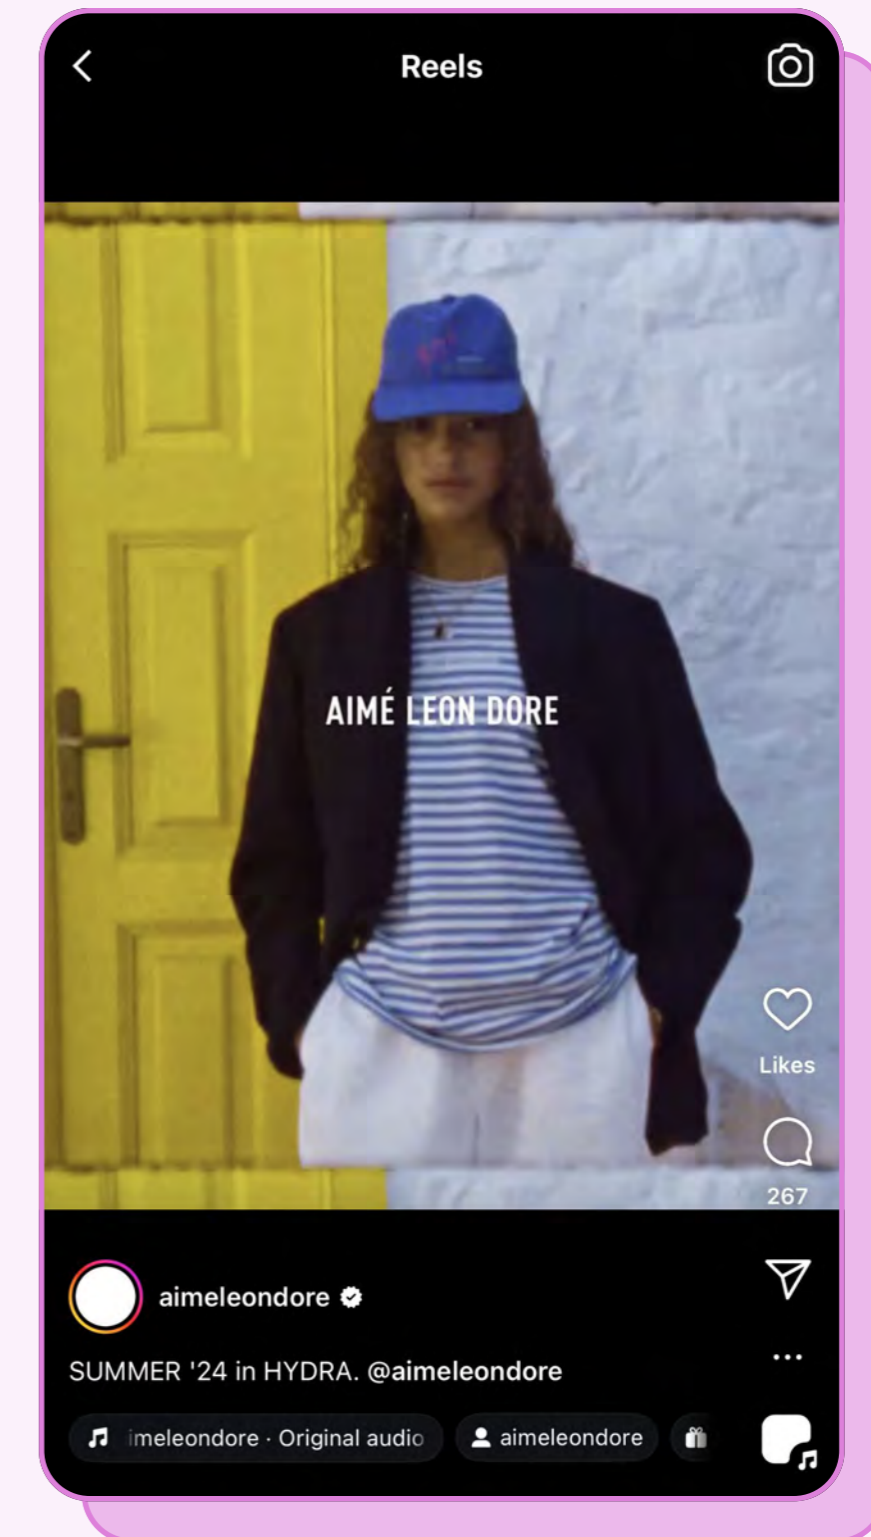

The cross-channel engagement rate has seen an increase in the second half of 2024 for Instagram, while overall brand reach remains flat.

Images and Carousels Drive Greater Reach Than Reels

On average, single images (188.6K average reach) and carousel content (149.9K average reach) achieve greater reach than Reels (109.4K average reach).

Instagram Stories Continue to Drive Strong User Engagement

Instagram Stories continue to be a powerful tool for engagement, as demonstrated by impressive reach (14.1K) and completion rates (92%) that are high regardless of follower count. These metrics highlight the effectiveness of Stories in connecting with audiences and driving forward momentum, making them an essential part of any social media strategy.

@aimeleondore

Dash Hudson Insight

Single images and carousels can drive higher reach, yet Reels and Stories remain crucial tools for brand engagement and visibility.

YouTube Trends

Shorts See Substantial Increase in Views, While On-Demand Declines

Compared to six months ago, YouTube Shorts video views have increased by 153%, suggesting that the short-form offering continues to gain traction. Meanwhile, On-Demand video views dropped by 15%.

Shorts Drive Higher Engagement Compared to On-Demand

YouTube Shorts receive three times more likes than On-Demand, differentiating the format as more engagement-driven. Users' tendency to comment on and participate in whatever they're watching is beneficial to brands looking to build community.

YouTube Has Higher Viewer Retention Compared to TikTok

YouTube's role as a search engine significantly contributes to its higher viewer retention rates, with users completing an average of 67% of videos, compared to TikTok's 25%-30%. Unlike TikTok's infinite scroll, YouTube leverages Google's advanced discoverability tools to help users find content tailored to their interests. For brands, optimizing YouTube content like blog posts ensures it reaches and engages the right audience effectively.

@realmadrid

Dash Hudson Insight

YouTube Shorts has experienced significant growth in video views yet remains a largely untapped opportunity for brands.

Across All Industries

Cross-Channel Engagement Rate is a metric designed specifically for this report. It allows for an equal comparison across TikTok, Instagram, and YouTube by applying the same calculation across all three platforms.

Calculation: TikTok and Instagram = (Likes + Comments + Shares) / Reach | YouTube = (Likes + Comments + Shares) / Video Views

Sports Brands Excel on TikTok, Instagram and YouTube With Engaging Content

Brands Achieve Incredible Reach and Engagement on TikTok, Proving It's a Worthy Investment

The sports industry is seeing remarkable reach and engagement on TikTok, making it a valuable platform for brands and teams. With impressive audience interaction and content visibility, TikTok is proving to be a smart investment for sports brands looking to connect with fans and expand their digital presence.

Brands Excel on Instagram With Massive Follower Count and Strong Engagement

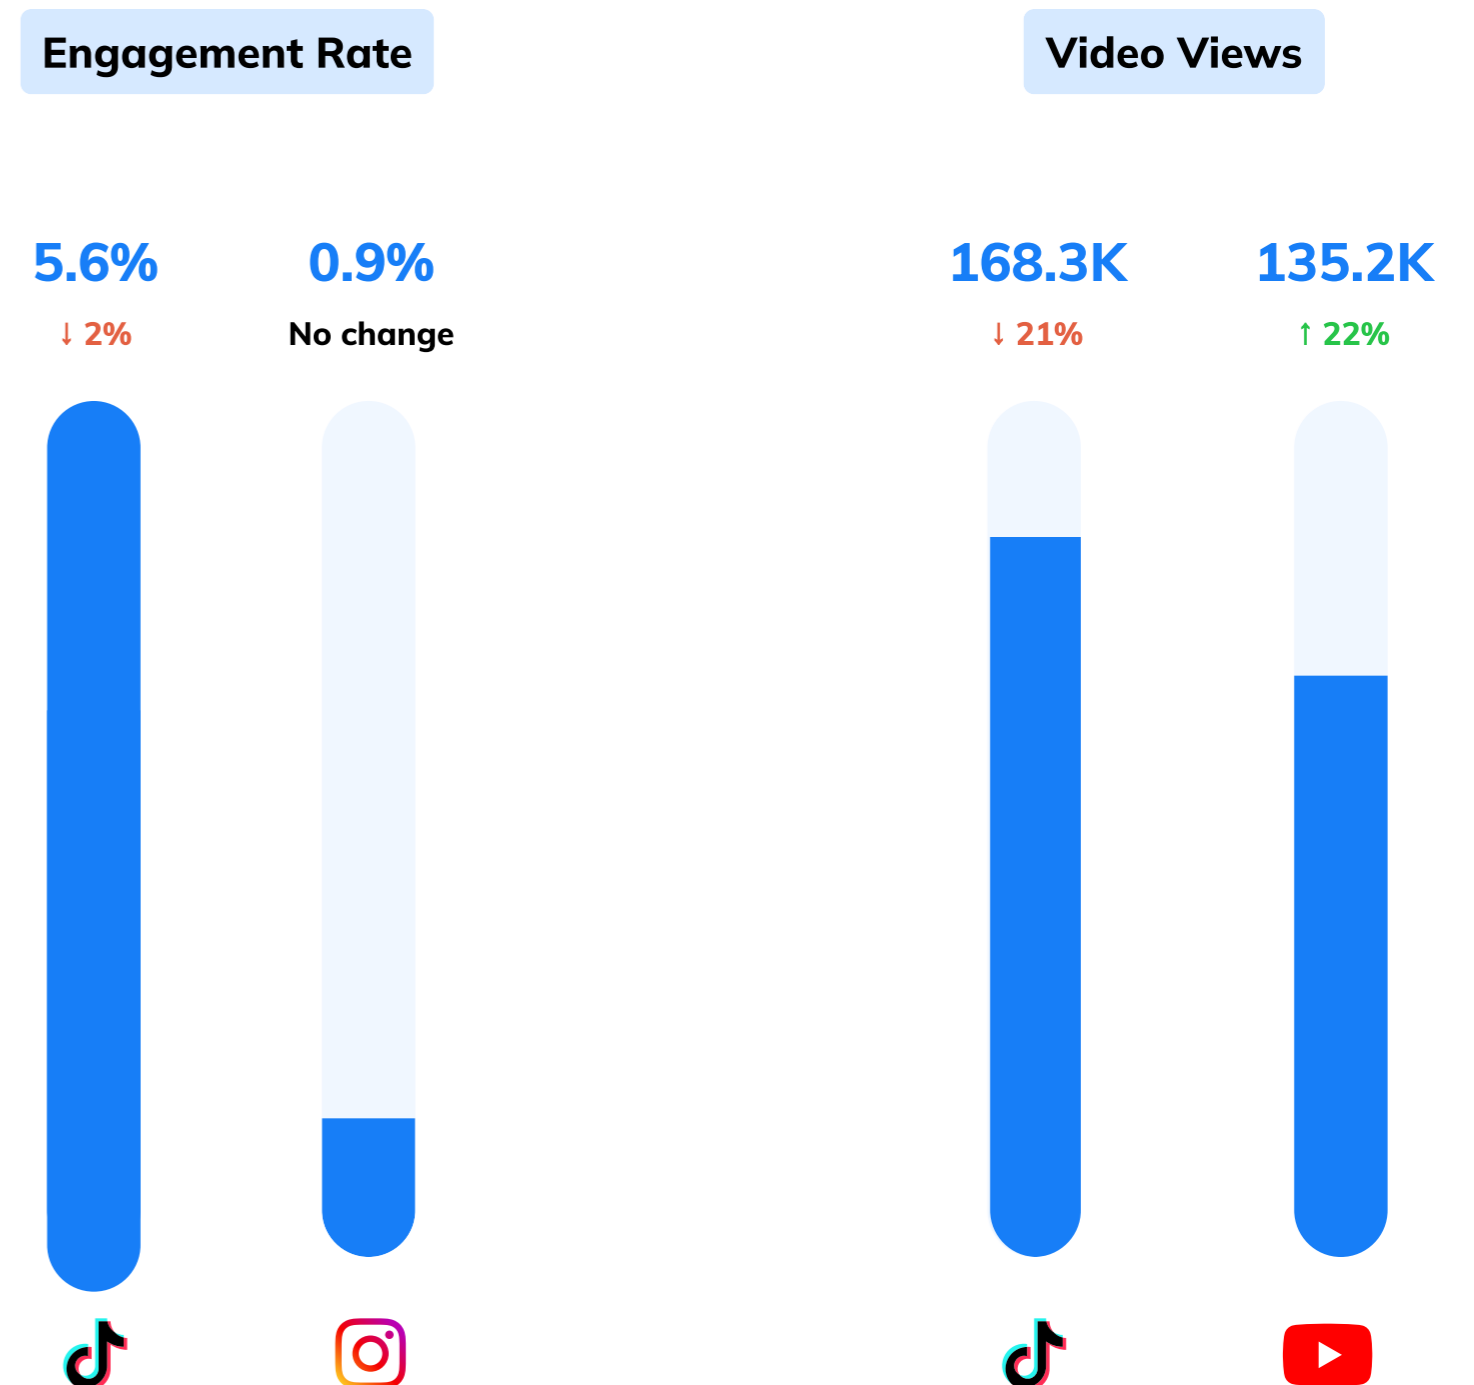

Sports brands dominate with the highest number of followers, far surpassing other industries. With a robust weekly posting schedule of 12 posts and 6 Reels, they maintain an aggressive content strategy that caters to their audience's demand for frequent updates. This approach is effective, as evidenced by the industry's leading engagement rate.

Sports Teams Capture Audiences With Highlights on YouTube Shorts

The sports industry on YouTube boasts impressive video views, excelling in both On-Demand and Shorts content, with Shorts performing slightly better. Sports teams effectively leverage highlights to captivate audiences, driving high engagement. This dual focus helps maintain a strong viewer base and showcases the dynamic nature of sports content.

Real Madrid uses YouTube Shorts to share thrilling match highlights, perspectives of players on the ground and interactive videos that show the team having fun. Its content strategy keeps fans globally connected and continuously engaged through exhilarating short-form videos.

Real Madrid outperforms the average Shorts Video Views for sports brands by **139%**.

What We Can Learn From Sports Brands' Strategies

Highlight Action-Packed Content

Utilize dynamic, action-packed videos to capture and maintain viewer interest, particularly effective on platforms like TikTok where engaging visuals are crucial.

Showcase Exclusive and Authentic Content

Provide exclusive behind-the-scenes looks and authentic portrayals of sports culture to enhance engagement rates and build community, especially on visual platforms like Instagram.

Focus on Community-Building

Center content around athletes and community interests rather than products to foster a strong connection and encourage engagement, particularly effective on platforms like YouTube where longer-form content allows deeper storytelling.

DASH HUDSON

Outsmart Social

Dash Hudson is a social media management platform that equips brands with intelligence and speed to stay ahead of the curve. Through its sophisticated cross-channel insights and workflow tools, Dash Hudson enables brands to create content that entertains, engages, and drives consistent business results. To discover how Dash Hudson empowers brands to outsmart social, visit dashhudson.com.
